

Supplementary figure 1

Individual patient trajectories regarding rituximab dose and intervals are shown here. Each horizontal line represents one patient. Patients are sorted by randomization group and final dose. Colors and pattern indicate latest rituximab doses: 1000mg: solid purple; 500mg: dashed blue; 200mg: dot-dash green. Vertical markers indicate the moment of RTX infusions, black X indicates switch to another b/tsDMARD and open circles indicate end of RTX follow up (i.e. switch to another b/tsDMARD or end-of-study censoring).
