

## SUPPLEMENTARY MATERIALS

Supplementary Figure S1. Flowchart of minimal disease activity groups

Results are shown as number of patients. Drop-out rates were 6% [6/104] for sustained MDA, 8% [5/60] for non-sustained MDA and 8% [6/76] for no MDA. LTFU: loss to follow-up; MDA: minimal disease activity.

**Supplementary Table S1.** Baseline characteristics of study patients not categorized vs categorized in a MDA group
