<tr>
<td><strong>Educational Needs among Health Professionals in Rheumatology (HPR) in Europe</strong></td>
<td></td>
</tr>
<tr>
<td>Dear Participant,</td>
<td></td>
</tr>
<tr>
<td>you are invited to participate in a research study titled “2021 Update: Educational Needs among Health Professionals in Rheumatology (HPR) in Europe. A survey initiated by the Educational Subcommittee of the EULAR (= European Alliance of Associations for Rheumatology) Standing Committee of HP in Rheumatology, in collaboration with the EULAR Standing Committee of Education and Training (ESCET).” This study is being conducted by a team of international researchers.</td>
<td></td>
</tr>
<tr>
<td>This project is in line with EULAR's strategic objective, that by 2023, the EULAR School of Rheumatology (ESOR) &quot;will be the leading provider of education in rheumatic and musculoskeletal diseases (RMDs)&quot;. More than 5,000 participants are already enrolled in the online courses that ESOR provides. However, providing education is especially difficult for health professionals in rheumatology (HPR) as non-medical HPs include different professions (nurses, occupational therapists, physical therapists, and others), with different needs regarding content and level of education (within and between countries in Europe). To be able to become the leading provider of education it is important to have information on the motivations and needs regarding education on the post-graduate level for HPR working in rheumatology across Europe.</td>
<td></td>
</tr>
<tr>
<td>Our survey was designed to investigate these questions. The survey consists of four sections: (1) a general section asking about demographic data; (2) a section asking about HPR educational motivations and needs; (3) a section asking about barriers and facilitators to use offerings of EULAR; and (4) a section asking about experiences with the current offerings. Even if you do not know anything about EULAR or EULAR School of Rheumatology, we are interested in your opinion on the topic and ask you to fill in the questionnaire. There are no correct or incorrect answers since we are only interested in your personal perspective on this topic.</td>
<td></td>
</tr>
<tr>
<td>The whole survey will take you approximately 20 minutes to complete. Your participation in this study is entirely voluntary, and you can withdraw at any time.</td>
<td></td>
</tr>
<tr>
<td>Your answers are anonymous, treated strictly confidentially, and only used for the purpose of this study. Source data of this study will be stored according to regulations for 10 years. No-one besides the study team will have access to the data.</td>
<td></td>
</tr>
<tr>
<td>Data collected, which will not be linked to any individual participant, may be published as research articles in print and/or online, and presented at conferences.</td>
<td></td>
</tr>
<tr>
<td>By clicking the 'next' button below, you agree to participate in this study, and that we may use your anonymous data for analyses. You can interrupt the questionnaire and come back later if you wish to do so.</td>
<td></td>
</tr>
<tr>
<td>Thank you very much for participating in this study.</td>
