

1 **Supplemental Figure 1 Improvement from baseline over time in continuous, key PsA domains in guselkumab-randomized patients**

2
3 Outer circles indicate greater improvement in outcome measures. Results are shown in logarithmic scale due to scale difference in the outcomes
4 assessed. DSS=Dactylitis Severity Score; LEI=Leeds Enthesitis Index; PsA=psoriatic arthritis; Q4W=every 4 weeks; Q8W=every 8 weeks;
5 SJC=swollen joint count; TJC=tender joint count; VAS=Visual Analog Scale; W=week.
