*ICD: International Statistical Classification of Diseases and Related Health Problems; according to list by the World Health Organization (WHO). Both in- and outpatient contacts were included from the establishment of the registry in 1976. Time window applied was 0-10 years prior to baseline for all disease, and ever for malignancy. Datacut was by August 10, 2018

ASDAS: Ankylosing Spondylitis Disease Activity Score; BASDAI: Bath Ankylosing Spondylitis (BAS) Disease Activity Index (0-100); BASFI: BAS Functional Index (0-100); CRP: C-reactive protein; CDAI: Clinical Disease Activity Index; DAS-28: Disease activity score (4 variables); HAQ: Health assessment Questionnaire (0-3); MTX: Methotrexate; PASS: Patient Acceptable Symptom State (yes/no); Patient pain (VAS 0-100), fatigue (VAS 0-100), patient global assessment (VAS 0-100), and physician global VAS (visual analog scale [VAS], 0-100). For patient discretion, numbers below 5 are not presented.
